

Instructions for Use of the NRR Contest Logger

From the Novice Rig Roundup web site or this link below, open the NRR Contest Log login:

<http://novicerigroundup.org/nrrLogger/login1.php>

To create a new user account for the NRR, hover your cursor over the “HERE” link in “Click HERE to create a new account for logging in.”

HERE to create a new account for logging in.' where 'HERE' is a blue underlined link."/>

NRR CONTEST LOG

Log in to Existing Account

Callsign:

Password:

Login

Click [HERE](#) to create a new account for logging in.

The new user link will open the dialog as displayed below. To create a new account, enter your station call sign, your desired password, your first and last name and the email address where you will receive your account confirmation and any communications from the event sponsors. Click the SUBMIT button when you are satisfied with your data entry.

NRR Contest Log Account Creation

The Novice Rig Roundup (NRR) has been active for only a few years but it is gaining a great deal of popularity among many hams who are interested in building their own equipment, maintaining, repairing and operating older 'Novice-era' radios, and using Morse code. Their annual contest allows for a friendly opportunity to show off the capabilities of their gear, antennas, Morse code skills, and their ability to use the equipment so popular prior to the 1980s.

Use this page to generate a request for a login account that will enable you to participate in the NRR contest and submit your contacts on-line. Fill out ALL FIELDS carefully and accurately, then click on the 'Submit' button. Your request will be reviewed by a contest administrator and approved as quickly as possible. Be sure to check your email periodically in case the admin has a question regarding your account request. You may direct questions regarding this contest to nrr@novicerigroundup.com.

You do NOT have to use 'Novice-era' equipment to participate in the contest but your score can grow faster if you do!

Thank you for your interest in the NRR contest...and GOOD LUCK!

Your Ham Callsign:	<input type="text"/>
Desired Password:	<input type="password"/>
Re-Type Desired Password:	<input type="password"/>
First Name:	<input type="text"/>
Last Name:	<input type="text"/>
Email Address:	<input type="text"/>
Re-Type Email Address:	<input type="text"/>

Upon submitting the requested information, you will receive the notice listed below. Wait for a logger administrator to approve your access. Log on after 24 hours. If unable to log on, please send a email reporting the trouble to 2019nrr@gmail.com

An account has been created for WA7ABC. An administrator will approve your access within 24 hours; probably sooner. If you are still unable to log on after 24 hours, please send an email to nrr@novicerigroundup.com requesting assistance.

Please close this window.

After creating your account, log on to the NRR Contest Logger with your call sign and password at:

<http://novicerigroundup.org/nrrLogger/login1.php>

HERE to create a new account for logging in.' is displayed in a black serif font, with 'HERE' being a blue underlined hyperlink."/>

Also in the upper left corner is a button labeled, "Show Log". Clicking this button will display your NRR contest log.

Count: sequential number of the contact

Date: the date of the contact

Time: the UTC time of the contact

Contact callsign: the callsign of the station you contacted

Contact name: the name of the operator of the station you contacted

Band: the frequency band of the contact

Send Rig: the class of the station you used to make this contact

QTH: the location state or country of the contact

RST sent: the RST you sent to the station contacted

RST receive: the RST you received from the contacted station

Power received: the PA input power of the station you contacted (if sent to you)

Power sent: the PA input power of the station you used to make this contact

NRR #: the Novice Rig Roundup number of the station contacted (if sent to you)

SKCC #: the SKCC number of the station contacted (if sent to you)

Comments: any comments or notes you want to make concerning this contact
(limit: 256 characters)

The log displayed below is a sample from a screen shot taken during testing of the logger. None of the contacts are actual contest contacts.

Resume

Count	Date	Time	Contact callsign	Contact name	Band	Send Rig	QTH	RST sent	RST received	Power sent	Power received	NRR #	SKCC #	Comments
1	180303	0015	K3OUC	BILL	80	NV1	PA	599	599	75	250

Click the “Resume” button to return to the main logging page.

Also in the upper left corner is a button labeled, “My Stats”. Clicking this button will display a summary of your contacts broken down by class, multipliers and total points. This data table will populate as you make contacts during the contest.

Classes are Unconfirmed and Confirmed Novice-1 contacts, Unconfirmed and Confirmed Novice-2 contacts, Total Contacts, Total QSO’s, Unique QTHs (states and countries), and Total points as calculated by the scoring algorithm.

User	Uncon NV1	Uncon NV2	Uncon Total	Con NV1-NV1	Con NV1-NV2	Con NV2-NV1	Con NV2-NV2	Con Total	Total QSOs	Unique QTHs	Total points
KA7ABC	0	0	0	0	0	0	0	0	0	0	0

Click the “Resume” button to return to the main logging page.

Back at the main logging page, you may hover your cursor over any data field label to view the requirement for data in that field.

There are FIVE required data entries for each completed contact:

CALLSIGN of the station worked

NAME of the operator of the station you worked

FREQUENCY BAND of the contact (80, 40, 15, 10, or 2 meters)

STATE, PROVINCE OR COUNTRY of the station you worked

YOUR TRANSMITTER CLASS (Novice1 or Novice2). More information is provided below about these classifications.

The “Your rig” data field is where you classify your station for scoring purposes for this contact. A Novice1 station is a Novice-era transmitter using PA input power of 75 watts or less and using crystal frequency control.

A Novice2 station is a Novice-era transmitter using PA input power of 250 watts or less and using VFO frequency control.

A Novice1 station may be commercially manufactured, assembled from a kit of parts or homebrew. In making the decision to classify a station as Novice1, it must meet the test of PA input power of 75 watts or less and uses crystals for frequency control. It should also be vintage to the era of Novice class licenses prior to 1981 in actual age or in its inherent design characteristics.

[Download NRR Rules, Scoring and SPC list for QTH entries here.](#)

Duplicate contacts may be logged but do not increment scoring. A duplicate contact will appear highlighted in light red on the QSO list.

Contacts for scoring may be made with the same station on different frequency bands. Two contacts with the same station on the same frequency band is a duplicate contact.

Valid frequency bands for contact are CW on 80, 40, 15, 10, and 2 meters. Thus, you may contact the same station once on each of these bands for score.
